

26 July 2024

Chris Ritchie
Director, Industry and Assessment
Department of Environment and Assessment
Locked Bag 5022
Paramatta NSW 2124

Dear Chris,

Request for Secretary's Environmental Assessment Requirements (SEARS) - Project Apollo Data Centre

We write on behalf of *Goodman Property Services (Aust.) Pty Ltd* (Goodman) to request the Department of Planning and Environment (DPE) to issue Secretary's Environmental Assessment Requirements (SEARs) for a data centre at 4-10 Talavera Road, Macquarie Park (the site).

Goodman is a digital infrastructure company. Goodman owns, develops and manages high quality, sustainable properties that are close to consumers and provide essential infrastructure for the digital economy. This includes warehouses, large scale logistics facilities, data centres and business and office parks globally. Further information on Goodman's business details are provided below:

Goodman Property Services (Aust.) Pty Ltd	
ABN	40 088 981 793
Address	The Hayesbery 1-11 Hayes Road Rosebery NSW 2018 Australia

Subject site

The site is located at 4, 6A and 6-10 Talavera Road, Macquarie Park within the City of Ryde local government area (**LGA**).

The site is currently owned by 'The Trust Company Limited' (ACN 004 027 749) as custodian for Goodman Australia Industrial Trust No. 3 and held in four lot titles as outlined in **Table 3** below.

The site has a primary frontage to Talavera Road of approximately 205 metres and a maximum overall depth of approximately 150 metres, comprising a total area of approximately 23,190sqm.

The site is zoned E3 – Productivity Support and is located within the Macquarie Park Corridor, a significant economic and employment precinct in Sydney's North District contributing to national and global economic development.

Address	Lot Number	Deposited Plan	Area (m ²)
4 Talavera Rd, Macquarie Park	11	733881	10,289
6A and 6-10 Talavera Rd, Macquarie Park	4	1031467	12,901
	10	883750	
	11	883750	
Total Site Area (approximately)			23,190

Figure 1 – Legal Description and site area

The site in context is shown at Figure 1 and an aerial of the site is shown at Figure 2.

Figure 2 - Site context (Base source: Urbis, Six Maps)

The site is bounded as follows:

- **North:** M2 Motorway to the immediate north. Further to the north is a residential neighbourhood (including the Macquarie Gardens residences) and various green spaces such as Lane Cove National Park, Tuckwell Park and the Lane Cove River.
- **South:** Talavera Road is to the immediate south. Beyond that are numerous four to six storey commercial office buildings. Still further south is the Macquarie Park Metro Station, Excelsia College and the approved future commercial development at 45-61 Waterloo Road.

- **East:** Lane Cove Road immediately to the east. Beyond that is a five-storey commercial building currently tenanted by Abbott Laboratories medical company and other commercial and light industrial uses.
- **West:** To the west of the site is existing commercial buildings owned by Goodman. Further to the west is the Macquarie Technology Park on the corner of Talavera Road and Khartoum Road. Further afield are a variety of commercial developments, as well as the North Ryde Meriton Suites, Macquarie Centre shopping centre and Macquarie University.

The Proposal

The proposed development comprises the demolition of existing structures on the site and bulk excavation to facilitate the construction, fit out and 24/7 operation of a Data Centre.

The proposal will seek to develop a Data Centre floor plus ancillary office space with an initial load capacity of approx. 90MVA and associated carparking and landscaping.

Key components of the proposal includes:

- demolition of existing structures and bulk excavation of the site
- detailed earthworks and infrastructure construction, including vegetation clearing, installation of services and drainage infrastructure
- construction, fit out and 24/7 operation of a data centre with total GFA of 15,398sqm, including 3,576sqm of office
- a floor space ratio (FSR) of approximately of 1.27:1 (Ryde LEP provides a 1:1 maximum base FSR; and 1.5:1 maximum "Incentive" FSR for the site)
- approximate 40 - 44m building height over 4 floors, including an acoustic screen parapet (Ryde LEP has a 30m maximum base height limit; and 45m maximum "Incentive" height limit)
- provision of approx. 45 car parking spaces to meet operational requirements
- Vehicle access for 20m articulated vehicles
- Landscaping of 6,010 (23.8% site area)

The site is zoned E3 Productivity Support, which permits 'data storage' use, and includes as its first objective '*To provide a range of facilities and services, light industries, warehouses and offices*'.

The DPE have proposed to restrict Data Centre use within the E2 – Commercial core zone of "Stage 1" planning proposal for Macquarie Park. This significantly reduces viable sites of scale within Macquarie Park which can accommodate this essential development typology, enhancing the importance of the proposed development.

The proposed development will contribute to the Macquarie Park Strategy's near-term goals of creating new diversified employment space for approximately 1,000 new jobs in the next 1-5 years; and aligns with the 'Big Move' identified in the Strategy for Macquarie Park to transition to an innovation district.

State Significant Development

The proposal is for a data centre with ancillary office space, which is considered State Significant Development (SSD) under Schedule 1 clause 25 of *State Environmental Planning Policy (Planning Systems) 2021*:

25 Data centres

(1) *Development for the purpose of data centres that has a total power consumption of more than the relevant amount.*

(2) *In this section—
relevant amount means—*

(a) *for development in relation to which the relevant environmental assessment requirements are notified under the Act on or before 31 May 2023—10 megawatts, or*

(b) *for any other development—15 megawatts.*

As the proposal is anticipated to have a total estimated power consumption of **Ninety (90) MVA** the requirements of Section 25 are met and the proposal is SSD.

An SSDA application is proposed to be lodged under section 4.38 of the Environmental Planning and Assessment Act 1979 (EP&A Act), for assessment as SSD.

DPHI are requested to issue SEARs under section 4.12 of the EP&A Act and Clause 3 of Schedule 2 of the Environmental Planning and Assessment Regulation 2021 that will enable the preparation of an Environmental Impact Statement (EIS) for the proposed development.

Key Issues

The EIS will be prepared in accordance with the SEARs and the legislative requirements defined under the EP&A Regulation. The EIS will outline recommendations to address any environmental impacts of the project to inform DPE in its assessment and recommendation on the project.

Key assessment issues for consideration are likely to be bulk and scale due to the necessary height and floor space ratio of the facility. Noise and air quality impacts will also be key considerations.

Visual Impact

Visual impact, particularly on the residential receivers across the M2 freeway to the north will be a key consideration, however, is alleviated through a generous setback of 130m across the freeway.

The proposed height will be approximately 44m - 1m less than the 45m permitted under the Ryde LEP Incentive height map. The proposal seeks to limit the bulk and scale and ensure the development presents a high-quality outcome. The architecture form will provide articulation and visual interest to the facades through strategic location of office spaces and use of high-quality materials and landscaping.

Furthermore, the proposed bulk and scale is consistent with the surrounding commercial and other surrounding buildings, including the Talavera Road Data Centre at 17-23 Talavera Road, Macquarie Park.

Air Quality & Noise

Air quality and noise impacts will be considered in the assessment, with mitigation proposed as necessary, including noise screening and other measures.

Conclusion

We trust that the above information is sufficient to enable the issue of SEARs for the proposed development. If you wish to discuss any aspect of this letter, please contact Guy Smith on 9230 7225.

Yours sincerely

A handwritten signature in black ink, appearing to be "Guy Smith", with a stylized flourish at the end.

Guy Smith
